Let's meet!

Asplant is a family company – we have over 30 years of experience in pesticides and sanitary measures production.

Our strengths are:

Modern technological facilities.

We specialise in liquid formulations. At our installations, we can do both short runs and large-scale production for you. If you need it - we will store it for you, pick it up when you need it.

Ecology.

When producing chemicals, is it possible to feel internally ecological at the same time? Drop by our factory, we'll show you everything we are doing to leave future generations a cool place to live.

Excellent location.

We have the railway line just over the fence, to the motorway 10 km. A number of companies specialising in the production and confectioning of chemical preparations have formed around the former chemical plants. We are working with them to complete our capabilities.

Laboratory facilities.

We will do most of the basic qualitative and physico-chemical tests for you, as well as laboratory-scale sample batches. If you need certified testing - we will perform it for you at one of our partner accredited laboratories.

Customers from all around the world trust us!

Our services

Formulation

We specialise in liquid SC, EC, OD and microencapsulation formulations.

Our efficiency:

- EC formulations: 4-7 tons per 8 hours shift
- SC formulations: 3-4 tons per 8 hours shift
- OD formulations: 3-4 tons per 8 hours shift
- MC formulations: 150-300 liters per 8 hours shift

**We can prepare for you:
Plant protection products.**

We have produced insecticides, herbicides, fungicides or seed treatments for our customers. And what do you need?

Pest control.

The Pest Control market is our 'home' market. This is what we started with and what we are known for in the local market.

What is your idea?

Maybe you don't need pesticides, just detergent? Or some automotive measure? Let's think together about how to do this.

We operate comprehensively.

We offer:

- Support in recipe development
- Assistance with recipe registration
- Selection of packaging and suppliers

Our services

Repacking

Do you have a product that does not appeal to customers?

We can help you repackaging it by changing the volume or packaging, and we can work on its formula (regrind and recertification) if there are quality problems.

Our services

Confectioning

We provide services in the field of packing liquid products into containers with a capacity of 25 ml to 200 liters.

Our efficiency:

PESTICIDES CONFECTION INTERGRATED LINE:

- Atomizer bottles: (450-660 ml)-2600-2900 pcs/shift
- Round coex bottles: (1 liter)-3400-3600 pcs/shift

MANUAL CONFECTION – custom packaging for individual pricing (capacities from 10 ml to 20 l)

You can register and sell all
11 products in your country.

Aspermet 200 EC EC, Concentrate for water dilution

Operation of the product:

A very broad spectrum of action - effective in the fight against flying insects (mosquitoes, flies, midges), ticks, bed bugs, warehouse pests, food pests.

Competitive advantage:

Product that can be used for hot fogging and ULV method. It can be used outdoors, most often chosen mosquito and tick control on large-areas. A gentle and non-allergenic active substance that is safe for humans.

Capacity: 50ml/100ml/250ml/1l/5l

The content of active substances: Permethrin 200g/l

Dose: 1% when fogging, 2% thick drop

Target market: Professional/hobby

Alfasekt Plus

SC, Concentrate for water dilution

Operation of the product:

A very broad spectrum of action - effective in the fight against flying insects (mosquitoes, flies, black flies), bed bugs, warehouse pests and food pests. Also perfect for fighting crawling insects: cockroaches, cockroaches, pharaoh ants or silverfish.

Competitive advantage:

Universal product for professionals - kills flying and running insects in 40 minutes. It is very efficient - protects up to 2000 m² in the case of 1 l of concentrate. Product effectiveness is enhanced by an auxiliary substance.

Capacity:	50ml/100ml/500ml/1l
The content of active substances:	Alphacypermethrin 50g/l, PBO 50g/l
Dose:	1%
Target market:	Professional/hobby

Cimex OUT

SC, Concentrate for water dilution

Operation of the product:

Broad spectrum of operation without temperature limits. Particularly effective against flies and bedbugs. It is also perfect for fighting running insects such as german cockroaches, cockroaches, silverfish etc as well as fighting flying insects (mosquitoes, black flies, ticks).

Competitive advantage:

No temperature limits for pest control.

Capacity:	50ml/100ml/500ml
The content of active substances:	Alphacypermethrin 50g/l, PBO 50g/l
Dose:	1% thick drop, 2,5% cold fogging, 5% hot fogging
Target market:	Professional/hobby

Karakill 10 MC

CS, Concentrate for water dilution

Operation of the product:

A product for elimination of crawling insects (German cockroaches, cockroaches, bed bugs, pharaoh ants, silverfish). Preparation in the microcapsuled formula.

Competitive advantage:

It is a universal product - it can be used in residential and public spaces. It is a preparation in the form of a microcapsuled concentrate, thanks to which it guarantees a long-lasting effect. Kills both crawling and flying insects.

Capacity:	500ml/l
The content of active substances:	Cyphenotrin 100g/l
Dose:	Thick drop 2.5%
Target market:	Professional

Karakill RTU

Ready to use

Operation of the product:

The RTU product is effective and safe to use due to the formula of microcapsules with the active substance immersed in water. Suitable for fighting: German cockroaches and cockroaches, silverfish, bed bugs, fleas.

Competitive advantage:

Ready to use, safe to use. Extremely popular product of the first choice in the event of the appearance of insects in the household.

Capacity:	550ml
The content of active substances:	Cyphenotrin 2.5g/l
Dose:	Ready to use
Target market:	Hobby

Grassfil Adjuvant

Operation of the product:

A non-toxic product with formula created for use as an additive preventing rain from washing contact insecticides, fungicides or fertilizers for foliar feeding of plants, as well as an anti-transpirant - preventing excessive evaporation of water from leaves or needles. For outdoor use only - designed to be use on green parts of plants.

Competitive advantage:

Prolongs the action of biocides during fighting ticks and mosquitoes.

Capacity:	1l/5l
The content of active substances:	No active substance in the composition
Dose:	2% thick drop
Target market:	Professional

Eliminator Ready to use

Operation of the product:

Innovative product designed for odor neutralization by chemical deactivation of their molecules. ELIMINATOR removes hundreds of organic and inorganic odorants. As a result of the chemical reaction, a new easily biodegradable and odorless chemical molecule is formed. Unique solution for fighting odors.

Competitive advantage:

The effect of odor neutralization and obtaining clean air is immediate and spectacular. A characteristic feature of the product is chemical deactivation of the odor molecules fragrance properties by starting chemical reactions of the active ingredients with unpleasant odorous molecules. So it is not masking odors with the use of sublime fragrances - it is elimination of odor molecules for good.

Capacity:	1l/5l
The content of active substances:	No active substance in the composition
Dose:	Depending on the concentration of malodorous in the specified area, dilute ELIMINATOR concentrate in water in a ratio of 1:10, 1:5 or 1:2 (from 100 to 500 ml of concentrate in 1000 ml of solution). Perform the treatment using a sprayer by putting the diluted product directly into the sprayer tank.
Target market:	Hobby

Herkules Propal S

Aerosol

Operation of the product:

INSECTICIDE PRODUCT IN AEROSOL designed for fighting all crawling indoor insects, such as: cockroaches, German cockroaches, fleas, bedbugs, pharaoh ants, silverfish, etc. It also effectively fights flying insects (flies, mosquitoes and others). The container is equipped with a special extension tube, particularly useful for the use of the product in hard-to-reach places (e.g. when exterminating wasps in nests). The preparation has contact and stomach effects.

Competitive advantage:

Product in aerosol form is ready for immediate use.

Capacity:	300ml
The content of active substances:	Neopynamin Forte 3.4g/l, Cyphenothrin 10.2g/l
Dose:	Ready to use
Target market:	Hobby

Mucho-Mord

Ready to use

Operation of the product:

Ready-to-use version of Cimex out. Broad spectrum of operation without temperature limits. Particularly effective against flies and bedbugs. It is also perfect for fighting running insects (German cockroaches, cockroaches, silverfish...) and flying insects (mosquitoes, black flies, ticks).

Competitive advantage:

It works against flies, mosquitoes and other flying insects. Instant action - right after 10 minutes. A very strong insecticidal mixture.

Capacity:	550ml
The content of active substances:	Alpha Cypermethrin 0.3g/l, Chlorfenapyr 1.7g/l
Dose:	Ready to use
Target market:	Hobby

Repellent „Coś na komary”

Aerosol

Operation of the product:

Aerosol product with formula designed for repelling mosquitoes, black flies, horse flies and ticks.

Competitive advantage:

Product ready for immediate use.

Capacity: 90-300 ml (according to customer requirements)

The content of active substances: Variant 1 - 50% DEET + 0.1% Citriodiol
Variant 2- 25% DEET + 0.1% Citriodiol
Variant 3 - 20% Citriodiol
Variant 4 - 30% Citriodiol
(Possibility of other variants as required)

Dose: Aerosol ready to use

Target market: Hobby

Kafar 600 EC

EC, Concentrate for water dilution

Operation of the product:

Concentrated product prepared mainly for fighting bed bugs and other insects in sanitary hygiene such as flies, mosquitoes, German cockroaches, cockroaches, pharaoh ants, indoor fleas etc.

Competitive advantage:

Product formula is mainly aimed at combating bedbugs. Contains high dose of active substance.

Capacity: 1l

The content of active substances: Permethrin 400g/l, Cypermethrin 100g/l, PBO 100g/l

Dose: 1%-2% thick drop, 33%-ULV

Target market: Professional

Our Standards

We are small, family company but we work according with Lean Management and ISO 9001 and 14001 methodology, we are implementing 5S standard.

We participate in the InterSilesia Project, which supports us in the dynamic development of export activities and international cooperation:

Our awards:

Our principles:

QUALITY

CREATIVITY

FLEXIBILITY

COOPERATION
